

Environmental Management System

Frequently Asked Questions (FAQ)

- **What are the pre-requisite courses before attending the Hazardous Waste Coordinator (HWC) Course?**
 - From the “Home Page” on this website, then clicking on the “Environmental Training” link. Once student registration has been complete in the MCI West Environmental Learning Management System (ELMS), the student must complete the following courses:
 - MCAS Miramar - EMS Awareness
 - Excellence in Warfighting - Environmental Excellence
 - Introduction to Hazardous Materials and Hazardous Waste Course
 - Greening Through Procurement (RLO)
 - Hazardous Material Storage (RLO)
 - Hazardous Waste Accumulation Area (RLO)
 - Hazardous Materials Transportation (RLO)
 - Hazardous Waste Transportation (RLO)
 - Hazardous Waste Storage - Less Than 90 Day Site (RLO)
 - Pollution Prevention P2 Awareness Training
 - If the student does not possess a Common Access Card (CAC) with a “usmc.mil) email address, then similar pre-requisite courses may be fulfilled through other tutorial methods. Please contact the MCAS Miramar EMS/CETEP Coordinator at (858)577-1306.
- **What does the EMS logo (Praying Mantis) mean or stand for?**

Our look: A Praying Mantis is a stealth-like predator, similar to that of a US Marine, able to blend itself to the surrounding environment. Designed to reach our intended audience's interests in science fiction action characters, video gaming and high adventure sports; the Mantis is the only insect with the ability to see very long range and swivel its head 180 degrees to keep its eyes on the mission and the environment. Shaped into an “M”. Marine, Miramar, Mantis.

- **Our words:** It has been said that a Marine...is a machine! Within each Marine, exists the code of conduct and within each electronic machine, exists computer coding. Any Marine will tell you, “Within each Marine (core), is The Corps”. Our slogan exemplifies our US Marines’ take on the mission and environment of the US Marine Corps. Our slogan is, “More than our Code, It’s our Corps”.
 - **Our image:** Each of us works and plays in the Marine’s operational environment. To conduct their training mission and be absolutely ready to fight battles, the Marine must have the proper training environment. To ensure this environment exists, the Marine must protect that environment. The Marine’s eyes are always on the mission and the environment. Our display and our policy statement reflect the Marines’ six environmental commitments.
